Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

- 1) ☐ Responsive to communication(s) filed on ____.
- 2a) ☐ This action is FINAL. 2b) ☒ This action is non-final.
- 3) ☐ Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

DETAILED ACTION

Claim Rejections - 35 USC § 102

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

2. Claim 1 is rejected under 35 U.S.C. 102(b) as being anticipated by Smith (5,290,060).

Smith discloses a gas generator comprising a gas generating agent 54; a cup body 34; a holder 58 with a squib 56 wherein the squib is seal in the cup body; an automatic igniting agent layer 78 provided on the inner surface of the cup body wherein the automatic igniting agent layer is formed by applying a solution containing the automatic igniting agent on the inner surface of the cup body and then drying.

Claim Rejections - 35 USC § 103

3. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

4. Claims 2 and 4-8 are rejected under 35 U.S.C. 103(a) as being unpatentable over Smith (5,290,060).

With respect to the weight of the automatic igniting agent layer, it would have been obvious to one having ordinary skill in the art at the time the invention was made to have the layer a specific weight, since it has been held that discovering an optimum value or workable ranges of a result effective variable

Art Unit: 3616

involves only routine skill in the art. The automatic igniting agent layer is in contact with the gas generating agent.

With respect to the weight of the ignition temperature of the automatic igniting agent, it would have been obvious to one having ordinary skill in the art at the time the invention was made to have a specific ignition temperature of the automatic igniting agent, since it has been held that discovering an optimum value or workable ranges of a result effective variable involves only routine skill in the art.

Allowable Subject Matter

5. Claims 9-11 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.
